Docket No. 1232-4635

LISTING OF CLAIMS

Claims 1-52 are pending in this application. Claims 2, 4, 7, 41 and 47 are amended. Claims 1, 8-40, 42-46 and 48-52 are canceled without prejudice or disclaimer.

The following listing of claims will replace all prior versions and listings of claims in this application.

1. (Canceled)

2. (Currently Amended) ~~The device according to claim 1, further comprising~~

An electronic device operating on the basis of a variable set value, comprising:

an operating section which inputs first setting instruction information for setting a parameter for a specific function of said device;

a reception section which receives second setting instruction information for setting the parameter for the specific function from an external apparatus; and

a setting section which determines a set value on the basis of the first or second setting instruction information and sets the set value as the parameter of the specific function.

wherein a set value which can be set by said setting section includes a set value to be set on the basis of only the second setting instruction information; and

a display control section which controls a display section so as to display a specific index when the set value set by said setting section is not a set value which can be set in accordance with the first setting instruction information.

3. (Previously Presented) The device according to claim 2, wherein said display control section controls the display section so as to display at least part of the set value information corresponding to the set value determined by said setting section.

Docket No. 1232-4635

4. (Currently Amended) The device according to claim ~~[[1]]~~ 2, further comprising a recorder which records an image on a recording medium in accordance with the set value set by said setting section.

5. (Original) The device according to claim 4, wherein the recording medium comprises a memory.

6. (Original) The device according to claim 4, wherein the recording medium comprises a film.

7. (Currently Amended) The device according to claim ~~[[1]]~~ 2, wherein the device comprises a camera.

8-40. (Canceled)

41. (Currently Amended) A method of controlling an electronic device having an operating section for inputting first setting instruction information for setting a parameter for a specific function of the device and a reception section for receiving second setting instruction information for setting the parameter for the specific function from an external apparatus, the method comprising:

~~the a~~ a setting step of determining a set value on the basis of the first or second setting instruction information and setting the set value as the parameter of the specific function, wherein a set value which can be set in the setting step includes a set value to be set on the basis of only the second setting instruction information; and

a display control step of controlling a display section so as to display a specific index when the set value set in the setting step is not a set value which can be set in accordance with the first setting instruction information.

42-46. (Canceled)

47. (Currently Amended) A storage medium which stores a control program for controlling an electronic device having an operating section for inputting first setting instruction information for setting a parameter for a specific function of the device and a reception section for receiving second setting instruction information for setting the parameter for the specific function from an external apparatus, the control program comprising:

the a setting step of determining a set value on the basis of the first or second setting instruction information and setting the set value as the parameter of the specific function, wherein a set value which can be set in the setting step includes a set value to be set on the basis of only the second setting instruction information; and

a display control step of controlling a display section so as to display a specific index when the set value set in the setting step is not a set value which can be set in accordance with the first setting instruction information.

48-52. (Canceled)
